

**Förderkreis des Rathgen-Forschungslabors e.V.**  
**Rathgen Heritage Science Scholarship 2017**

The Rathgen Research Laboratory is the leading institution for conservation science, art technology and archaeometry at the National Museums in Berlin. It carries out investigations on a broad variety of materials within the museum environment and focuses its research on scientific issues concerning the care of monuments and archaeological sites.

It carries forward the tradition of the world's oldest scientific museum laboratory, the Chemical Laboratory of the Royal Museums in Berlin, which was founded on April 1st, 1888 and bears the name of its first director, Friedrich Rathgen.

It is the mission of the Friends of Rathgen ([Förderkreis des Rathgen-Forschungslabors e.V.](#)) to support the work of the Rathgen Research Laboratory in various ways, among others by supporting research projects of young professionals in heritage science.

To this end, the Rathgen Heritage Science Scholarships have been established in 2009 and are awarded annually. The Rathgen Heritage Science Scholarship enables young professionals to undertake a project at the laboratory within a 1-3 month duration. The topic is proposed by the applicant. Successful applicants will receive a scholarship for Post-Graduate Scholarship of EUR 900 month and Post-doc Scholarship EUR 1200 per month.

The topic of the research project can be proposed freely by the applicant or chosen from the following three proposed topics, if the applicant has the required previous knowledge:

1. Development of a method for the removal of shell lacquer on ceramics without discoloring the objects through the solving of the lacquer.
2. Study of sicolo-arabic ivories from the *Kunstgewerbemuseum* and the *Museum für Islamische Kunst*.
3. Quantification of portable X-ray fluorescence analysis results and application on the study of archaeological glazes

The application consists of:

- 1-2 pages explaining the research proposal, the required resources and the envisaged time frame, including preliminary work accomplished and short bibliography
- CV including list of publications
- 2 reference letters of support

**Deadline for 2017 applications is February 19th, 2017.**

Please submit your application electronically to:
